PROFESSIONAL SUMMARY

Computer Science and Information Security student at John Jay College of Criminal Justice with an A.A.S. in Cybersecurity (GPA: 3.53). Completed 10 academic digital forensics investigations and practical security labs in pfSense, Linux firewall testing, and network analysis. Independently solved four Kean University CTF challenges; prior professional web-design experience in Nepal.

EDUCATION

John Jay College of Criminal Justice, CUNY | New York, NY

- Computer Science and Information Security — Currently enrolled

LaGuardia Community College, CUNY | Long Island City, NY

- A.A.S., Cybersecurity — June 2026 | GPA: 3.53/4.0

TECHNICAL SKILLS

Security & forensics: Autopsy, Wireshark, Burp Suite, Nmap, John the Ripper, zip2john, exiftool, Steghide
Networks & systems: Linux (Ubuntu, Kali, Fedora), Windows Server (coursework), pfSense, iptables, VPN, TCP/IP, DNS
Scripting & analysis: Bash, AWK, Python, SQL fundamentals, Netcat; incident-response and evidence-analysis labs

CYBERSECURITY PROJECTS AND COMPETITIONS

Digital Forensics Investigation Series | LaGuardia Community College

- Completed 10 documented academic investigations spanning disk/file recovery, Windows and Linux artifacts, network and mobile evidence, and incident-response scenarios.

Kean University Capture the Flag | Collegiate Competition, 2026

- Independently completed four challenges; used Burp Suite for cookie analysis, SQL injection testing, John the Ripper with zip2john for ZIP hash recovery, and exiftool for EXIF inspection.

pfSense Network Defense & Tailscale Connectivity | Virtual Lab

- Configured pfSense network interfaces and firewall rules in Hyper-V; validated test-host connectivity and examined advertised VPN subnet routes.

Linux Firewall and Service Security | Ubuntu / Fedora

- Tested iptables rules and TCP connectivity with Netcat; configured local FTP access with anonymous login disabled.

PROFESSIONAL EXPERIENCE

Assistant Web Designer | DIT Solution Pvt. Ltd., Kathmandu, Nepal | Aug 2022–Nov 2023

- Built responsive client websites using HTML, CSS, Bootstrap, and JavaScript; contributed to web projects with MySQL integration.
- Assisted with hardware troubleshooting, network configuration, and software installation for office and client systems.

ADDITIONAL TRAINING

Forensics data-hiding webinar — ThriveDX / RISE (2022) | Python Bootcamp (2025) | CUNY Cybersecurity Awareness (2025)
